Section 7: Instructor Insights

Key Observations

1.	4 out of 6 submissions (67%) scored 50% or above.
2.	2 submission(s) (33%) had compilation errors.
3.	1 submission(s) (17%) caused execution timeout — possible infinite loops.
4.	4 submission(s) (67%) had folder structure issues.
5.	3 submission(s) (50%) had missing or incomplete code header comments.
6.	1 submission scored zero — may require immediate follow-up.
7.	Q2b had the lowest full-pass rate (17%).
8.	Q1a had the highest full-pass rate (50%).

Per-Question Failure Breakdown

Question	Not Correct	Compile Err	Timeouts	Notes
Q1a	3	1	0	1 compile error(s)
Q1b	3	1	0	1 compile error(s)
Q2a	3	1	1	1 compile, 1 timeout
Q2b	5	1	0	1 compile error(s)
Q3	5	1	0	1 compile error(s)

Recommendations

1.	Revisit Q2b in future lectures — most students did not achieve full marks.
2.	Remind students to follow the required submission folder structure before the next assessment.
3.	Encourage students to compile locally before submitting to catch syntax errors.
4.	Highlight infinite loop risks in lab sessions — 1 submission(s) timed out.
5.	Reiterate the requirement for complete Name/Email header comments in all submitted files.
